- Start small

Reflection

To reflect back, the webinar has provided us useful insights into the company's various employment responsibilities and the corresponding technologies used. Employees openly described their daily experiences, highlighting the need of efficient time management in handling professional challenges.

Furthermore, we learned about the value of developing a solid foundation in fundamental concepts. A key lesson that serves as a foundation for professional development is the idea that high knowledge on fundamental concepts promotes a more efficient learning process and improves the quality of the work produced overall. Moreover, we were given guidance on enhancing our organizational skills. Advices were given by speakers to motivate us and help us solve any possible problems. Some of the advises are to be more organized in compiling works and assignments for the convenience of other teammates and for our own reference. We were also advocated to broaden our knowledge of the latest technologies as we have to be able to adapt with continuous technology advancements throughout our work life.

Overall, our team has gained an immense understanding on the skills that are sought the most from fresh graduates and how to balance or handle our work life obstacles. We are also grateful to have gain insights on how to be a successful employee.
